

Individualized Learning by Videodisc

J.J. Andriessen and D.J. Kroon, Phillips, Inc. 1980

"Comparing the interactive VLP system with slides and film projection, they mentioned the advantages of personal control, repeating, jumping through the material, and easy 'rewinding.'"

"A facility should be added to step back in the program without the use of selection menus."

"For experiments with interactive VLP systems, it would be better to have only the film and full-color pictures on the disc, and to have all text pictures in the computer program."
