

Review of Miscellaneous Films

Miracle of Life      Pyramid      1977      15 minutes

fantastic visuals - first film I've seen in this batch where  
the narration actually backs up visuals

the best examples fo far of a film that is mainly visual

dramatic use of time-lapse photography

really creates sense of wonder; should really motivate  
user/viewer to go deeper into subject; could be backed up  
with glossary/ text / and stills
